EXAMINER'S COMMENTS AND REASONS FOR ALLOWANCE

1. Request for continued examination (i.e., R.C.E.) under 37 C.F.R. §1.114, including the fee set forth in 37 C.F.R. §1.17(e), was filed in this application on 19 November 2008 after a Final action mailed 01 October 2008. Since this application is eligible for continued examination under 37 C.F.R. §1.114, and the fee set forth in 37 C.F.R. §1.17(e) has been timely paid, the finality of the previous Office action mailed 01 October 2008 has been withdrawn pursuant to 37 C.F.R. §1.114. Accordingly, an R.C.E. has been established and the action on R.C.E. follows.

2. The remarks filed 19 November 2008 are acknowledged and entered.

Claims Status

3. Claims 1, 5-7 and 9-11 are pending and are examined on merits.

Information Disclosure Statement

4. The Information Disclosure Statement (i.e., IDS) filed 19 November 2008 is acknowledged, has been made of record, considered and duly initialed/signed PTO form SB/08 is enclosed with the instant Office Action.

Examiner's Reasons for Allowance

5. The closest art is the following published European Patent Application that accompanied Applicants' IDS filed 19 November 2008:

- ❖ J.C. Hobson et al., Use of Yeast Cell Debris Products. European Patent Application 0 566 347 A2, Published 20 October 1993, Applicant: CPC International Inc.

Hobson et al., teach a process to prepare coloring agents, wherein, the steps are:

- I. Prepare yeast ghosts by two methods, wherein the
 - a. first method comprises the steps of:
 - (i) Treat cell residue with alkali;
 - (ii) bleach (i.e., decolorize) the alkali-treated cell residue; and
 - (iii) acid treat the alkali-treated and bleached cell residue.
 - b. second method comprises the steps of-

- (i) extract cell residue with acid;
- (ii) treat acid-extracted cell residue with alkali;
- (iii) bleach the acid-extracted and alkali-treated cell residue; and
- (iv) lower the pH of the bleached cell residue from sub step (iii) above.

II. Providing yeast ghosts prepared in step a above with an aqueous mixture of at least one color source among turmeric or annatto.

Thus, the instantly claimed method differs from Hobson et al's method in:

- The claimed method is to prepare a decolorized yeast cell wall fraction, wherein the decolorized yeast cell wall fraction is not colorized with a coloring agent;
- The claimed method is to prepare a oxygen permeability membrane from the decolorized yeast cell wall fractions by further treatment steps not described in Hobson et al's method; and
- The overall objective of the two inventions are entirely different (i.e., the referenced method is to prepare a coloring agent, whereas the claimed method is to prepare an oxygen-permeability barrier.

Furthermore, the Claimed method does not have an alkali treatment step for the preparation of yeast cell ghosts as described in Hobson et al's method. Thus, the prior method does not patentably make the claimed method obvious.

6. Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Claims 1, 5-7 and 9-11 are allowed.
